DETAILED OFFICE ACTION

1. This communication is responsive to the application filed on July 14, 2003.

Claims 1-7 are presented for examination.

Applicant's claim for foreign priority is acknowledged.

References in applicant's IDS form 1449 have been considered.

Claim Rejections - 35 USC §102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1-7, are rejected under 35 U.S.C. 102(e) as being anticipated by **Borella et al.**, (Borella) U.S. Patent No. **6,567,405**.

4. As to claim 1, Borella teaches a communication method in a communication system wherein a first information processing apparatus and a second information processing apparatus perform communication with each other over a network, comprising steps of:

providing, on said network, a third information processing apparatus for pooling a plurality of for-rent-out virtual addresses to be temporarily used by said first information processing apparatus (refer to Fig. 9, col. 9, lines 17-37);

Art Unit: 2155

requesting, by said first information processing apparatus, said third information processing apparatus to rent out a virtual address when said first information processing apparatus performs said communication with said second information processing apparatus (refer to Fig. 9, col. 9, lines 17-37);

renting out, by said third information processing apparatus, said virtual address on the basis of said request (refer to Fig. 9, col. 9, lines 17-37);; and

sending out, by said first information processing apparatus, a communication packet whose transmission-source address is set up by said virtual address and whose transmission-destination address is set up by an address of said second information processing apparatus (refer to Fig. 10, col. 9, lines 25-45).

5. Claims 2-7 do not teach or define any new limitation above claim 1, therefore, they are rejected for similar reasons.

6. Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in its entirety as potentially teaching of all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.
